Hard Water The Real Culprit

Hard water has excess of minerals such as calcium and magnesium that brings along a whole host of problems every day. Water with very high mineral content dries our skin and hair, makes our clothes turn pale and wears out our appliances.

KENT's range of Home Water Softeners are designed to resolve your daily hard water problems with a promise of a smooth performance. Choose a product that best suits your requirements and protects your hair, skin and clothes from hard water.

The Problem With Hard Water

Dries Your Hair & Skin

Wears Out Your Appliances

Leaves Your Utensils Yellowed

Prevents Lathering

Turns Your Clothes Pale

Make Hard Water Soft with KENT'S Best Auto Water Softeners for Your Home

With KENT, say goodbye to the hassles of hard water. Presenting KENT Home Water Softeners, expertly designed to effortlessly address your daily hard water concerns. Experience the dependable, top-notch performance that characterizes every KENT product. Select the ideal model to shield your hair, skin, and clothes from the damaging effects of hard water and naturally enhance your everyday life.

The KENT Auto Water Softener is both user-friendly and efficient, ensuring you always have access to soft water.

Advantages

Reduces Hair Loss & Prevents Drying of Skin

Increases Life Span of Appliances

Reduces Consumption of Soap & Shampoo

Prevents Fabrics From Losing Their Natural Look & Feel

Reduces Deposits on Bathroom Fittings & Marble Floor

Features

Automatic Regeneration Technology

KENT water softener uses a fully automatic regeneration process and microprocessor-controlled method to make hard water soft.

Time Based Regeneration

The water softener comes with an inbuilt microprocessor which helps in time-based regeneration process.

Chemical-free Water Softening

The water softener doesn't use any chemicals during the softening process. Hence, the softened water is completely safe to use.

Efficient Ion-Exchange Process

This water softener comes with an efficient exchange process.

Sand in Water Problems

Most households in India use tubewells, borewells and ground water to meet their daily water needs. Presence of visible dirt, sand, metal flakes and small stones in ground water might render it unsuitable for use.

Protect Your Home From Sand in Water

KENT Automatic Sand Filter - 100L

For Whole House, Bungalows & Large Families

Make Borewell Water Free from Sand & Mud

The high capacity microprocessor controlled KENT Automatic Sand Filter 100L backwash automatically, thus liberating you from the tedious and time consuming manual backwashing process.

It removes suspended particles like visible dirt and sand from water, it is designed to cut out the turbidity of water.

It's time to say goodbye to dirt, sand, metal flakes and small stones and welcome a continuous supply of clean water, 24 hours a day, 7 days a week.

Struggling with Poor-Quality and Foul-Smelling Water?

In many Indian households, tubewells, borewells, or groundwater are primary water sources. However, this water often contains high levels of chlorine, cysts, discoloration, and unpleasant odors, making it unfit for domestic use.

KENT Automatic Carbon Filter 100L

Enhance your water quality effortlessly with the KENT Automatic Carbon Filter. Designed to effectively remove excess chlorine, cysts, discoloration, and foul odors, it ensures cleaner and safer water for household purposes.

Equipped with a high-capacity microprocessor, the 100L KENT Carbon Filter automatically performs backwashing, saving you from the hassle of manual cleaning. Its advanced rejection/backwash mechanism efficiently eliminates contaminants and odors—such as egg or fish smells—making your water fresh and usable.
